**WEBINAR**

# Navigating the RHSC Strategy (25/35)

**Thursday 12 December**  
**9:30 EST / 14:30 GMT / 15:30 CET**

**REGISTER NOW!**

**Webinar to walk through RHSC Strategy (25/35)**

In October, RHSC launched its new 10-year Strategy. If you haven't already, check out the [RHSC Strategy \(25/35\) hub](#) to read about highlights including: the elevation of equity, a special focus on affordability, and our promise of transformational leadership with which RHSC will fully engage our 500+ member organizations. Navigate the next decade with us in an upcoming webinar diving into the strategy on 12 December, 9:30 EST / 14:30 GMT / 15:30 CET. [Register here.](#)

# Family Planning Market Report

## 2024 10<sup>th</sup> EDITION

## **FP Market Report highlights growth in contraceptive market & domestic government funding**

The 2024 Family Planning Market Report, produced by [CHAI](#) and RHSC, reveals an upward trajectory in public-sector contraceptive procurement including: a 17% increase in Couple Years of Protection (CYPs) shipped to the public sector, long-acting reversible methods continuing to account for the majority of CYPs shipped at 64%, up 1% from 2022, and UNFPA and USAID procurement values increasing by 11% from FY2022 to FY2023.

Findings point to increased domestic government funding: 49 low- and lower-middle income countries mobilized domestic funds for commodity procurement in 2022 or 2023, with 25 countries recording expenditures over \$1 million; and government spending through the UNFPA Match Fund has quadrupled from \$10.4 million in 2020 to \$44.7 million in 2023. [Dive deeper into these findings in a webinar](#) on Wednesday, 11 December at 9 AM ET | 2 PM GMT | 7:30 PM IST.

### **Three new awards from Catalytic Opportunity Fund**

In August, four recipients from African countries received awards from The Catalytic Opportunity Fund for Introduction and Scale-Up of New and Lesser-Used Postpartum Hemorrhage Medicines (NLUM-PPH COF). This month, three more organizations have been granted awards to scale up the use of heat-stable carbetocin and tranexamic acid for the prevention and treatment of PPH, respectively. Grantees will train master trainers in the use of both medicines and conduct facility-based training for health care workers. [Busoga Health Forum](#) will train in 11 districts of the Busoga sub-region in Uganda; the [Midwives Association of Kenya](#) will oversee professional development for health care workers in three Kenyan counties; and the [National Midwives Association of Uganda](#) will work in humanitarian/refugee-focused areas in four northern Ugandan districts. The COF is managed by RHSC and the Clinton Health Access Initiative and funded by MSD for Mothers\* and the UK's Reproductive Health Supplies Programme.

\*MSD for Mothers is an initiative of Merck & Co., Inc., Rahway, NJ, USA.

### **Rwanda shares government procurement data in VAN**

In October, Rwanda loaded its self-funded procurement data into the [VAN](#), making this the first time ever a country government has done so. By sharing this data, Rwanda stakeholders will have full visibility into family planning procurements across their own portfolio of self-procured products, as well as those procured by others on their behalf. A more holistic view of products flowing into the country means an increased ability to manage potential stock disruptions or imbalances, which ultimately leads to more clients with their family planning method of choice. [Read more.](#)

### **Blog unpacks private sector participation in menstrual health**

The private sector engaging in menstrual health and hygiene (MHH) goes beyond manufacturers and donors, and is, instead, a diverse set of actors, a new blog explains. Understanding this rich landscape can lead to better leverage of partner strengths and capacities to equitably and sustainably reach more people with quality MHH products and services.

[Read the piece](#), authored by Arundati Muralidharan (Global Menstrual Collective, Menstrual Health Action for Impact), Diana Nelson (Days for Girls International) and Sarah Webb (RHSC). Download the brief 'Demystifying the Private Sector' [here](#).

### **The Ambassador behind Togo's VAN success story**

Last month, we reported that Togo had become the first VAN country member to use its own domestic resources to pay for its premium membership subscription, marking a significant step towards sustainability. Read this [interview](#) with Togo's VAN Ambassador Dr. Abram Amétépé Agossou, in which he tells the behind-the-scenes story of the challenges that had to be overcome to put Togo on the map as a data pioneer.

#### **OUR NEWEST MEMBERS**

---

[Linksbridge](#) is a US-based consultancy working to amplify clients' and partners' missions to increase equitable access to life-saving and essential health products in low- and middle-income countries.

[Menstrual Health Action for Impact](#) (MHAi) is an organization based in India that leverages the menstrual health lens for the overall health and

well-being of girls and women in low and middle-income country settings, providing services related to research, advocacy and programs to organisations across the for-profit and non-profit landscapes.
